

Make-N-Take – Hands-On Clinic Description

Kevin O'Connor

GETTING A FREIGHT CAR KIT READY FOR YOUR LAYOUT

This make and take clinic focuses on getting that kit you just picked up at the last train show, swap meet, purchased on eBay or was gifted ready to run on your layout. A short presentation will be followed by each participant receiving either an Ahearn, Accurail, or Roundhouse HO scale 40' or 50' boxcar. When the clinic is completed, the boxcar will meet your requirements to run on your layout.

Participant Requirements

Bring the following tools: screw driver set, file set, #11 blade knife, ruler either scale or standard, needle nose plier, ACC and styrene glue. The following should be brought if you have them: a small portable scale that measures Oz, Kadee coupler height gauge, graphite tube. Metal wheels, couplers, weights will be provided.

Limitations

Clinic is limited to 15 attendees. Attendee cost \$12.

Note: Awaiting short personal bio.
